Versatility. Customization. Efficiency.

# Formed Wire Parts

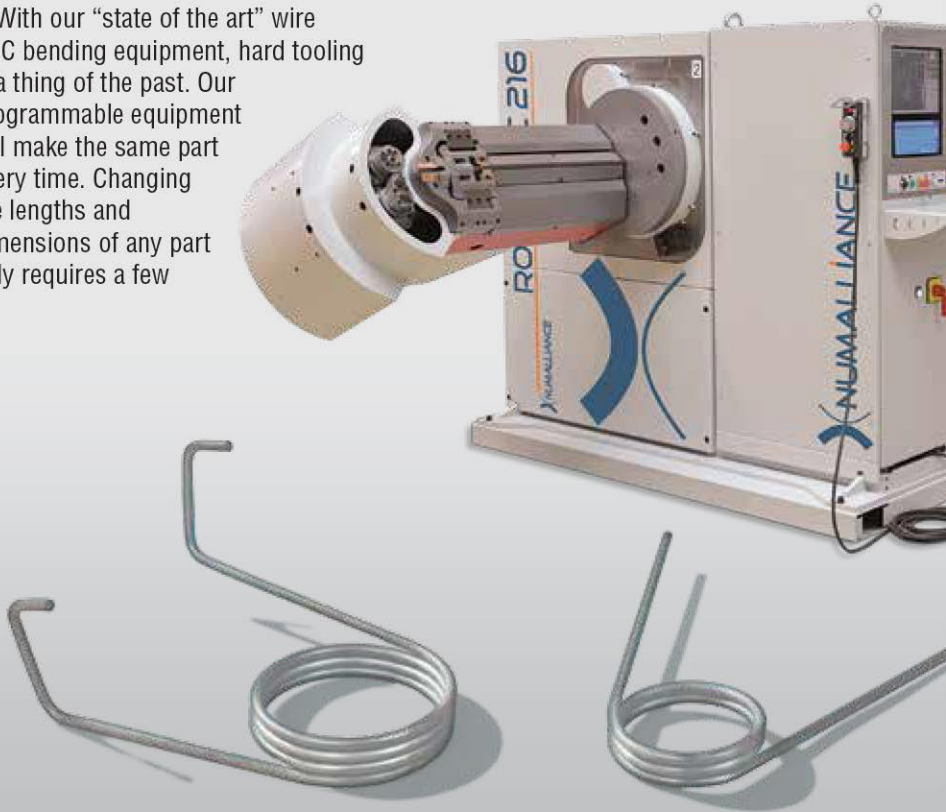

Barber Manufacturing Co. has two dimensional and three dimensional steel wire forming capabilities. Whether you are looking for a custom wire form for the furniture and bedding industries -- or parts for your manufacturing business -- we can help.

With our "state of the art" wire CNC bending equipment, hard tooling is a thing of the past. Our programmable equipment will make the same part every time. Changing the lengths and dimensions of any part only requires a few

taps on the computer touch screen.

Our equipment is capable of forming 10 gage (0.135") through 5/16" steel wire.
