

THE Rigid Bar Seat Strip

Versatility. Customization. Efficiency.

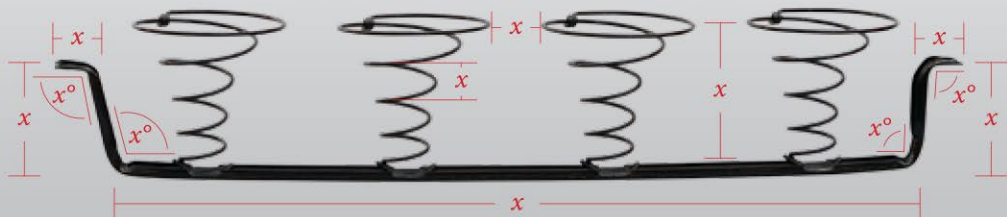

Rigid Bar Seat Strip

Rigid Bar Seat Strips are recommended for ease of installation. These seat strips may be purchased individually or as a completed unit. Rigid Bar Seat Strips will simplify your 8-way, hand-tied construction without sacrificing the quality or ride of your final product.

Our high carbon, heat-tempered springs combined with the heavy duty, roll formed steel bars are unparalleled in quality. We are able to customize every aspect of this high quality construction to address your unique application.
